DETAILED ACTION

Allowable Subject Matter

1. Claims 1-43 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or render obvious the claimed invention taken as a whole, the invention comprising a system for communicating data to a location through a communications network, comprising:

a mechanism for identifying first data, which is accorded a higher priority than second data to be processed in the location, a data object for transporting the first data being generated in response to an identification of the first data, the data object having: a predetermined data transport capacity, a header, and an information section, the first data being contained in the information section of the data object, the first data being without any data overhead portion associated with the first data within the information section;

a device for determining whether the predetermined data transport capacity exceeds the size of the first data by at least a threshold, at least some of the second data being inserted into the information section of the data object when it is determined that the predetermined transport capacity exceeds the size of the first data by at least the threshold; and

an interface for providing the data object to the location.

Specifically, the prior art fails to teach *a mechanism for identifying first data, a data object for transporting the first data being generated in response to an identification*

of the first data, the first data being without any data overhead portion associated with the first data within the information section. In the closest prior art, to Petersen et al, Petersen discloses minicells multiplexed into a larger ATM cell, according to priority. However, Petersen's ATM cells are created in response to the presence of data, not in response to the **identification** of a higher priority data. Also, Petersen's ATM cells each contain a header which is inserted into the payload of the larger ATM cell; therefore, Petersen teaches away from *the first data being without any data overhead portion associated with the first data within the information section.* These limitations are present in each independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
